THANK YOU FOR SCHEDULING A GENETIC COUNSELING APPOINTMENT!

- For us to better serve you at your appointment, try to learn as much as possible about the cancers, cardiac conditions or other medical conditions in your family members (e.g., children, siblings, aunts, uncles, cousins, grandparents, great grandparents). We will ask who in the family had the condition and at what age it was diagnosed.
- Most insurances cover genetic counseling. If you have specific questions about coverage, contact your insurance directly to inquire about coverage for CPT code 96040.
- Genetic testing is optional. Most insurances cover genetic testing, when indicated. Genetic test options, insurance coverage and out of pocket costs (if any) will be reviewed with you at the appointment. A blood or saliva sample for genetic testing may be collected at the time of your appointment, if applicable.
